

SAFETY

Target: what to include in airbnb welcome book

The Local Emergency Evacuation Map Overlay

A visual emergency evacuation map for an Airbnb is a simplified floor plan explicitly highlighting primary fire exits, secondary escape windows, and the location of fire extinguishers. Integrating this life-safety graphic behind every bedroom door and inside the welcome book ensures strict compliance with local short-term rental regulations.

Implementation Outline

1

Asset Blueprint Requirements

Bulleted list of safety hardware that must be pinpointed (first aid kits, gas shutoffs).

2

Local Emergency Contacts

Formatted table of non-911 dispatcher lines for the specific county.
