

ARRIVAL

Target: airbnb check-in guide

The Smart-Lock Entry Sequence Poster

A visual Airbnb check-in guide for a smart lock is a sequential diagram demonstrating how to wake the keypad, input the dynamic access code, and engage the deadbolt mechanism. Providing this printable guide prevents late-night lockout calls and physical damage to the hardware from user error.

Implementation Outline

1

State Machine Diagram

3-step visual sequence (Wake → Code → Turn) mapped out cleanly.

2

Hardware Compatibility List

Bulleted list of common brands (Schlage, Yale, August) and their specific keypad quirks.
