

AMENITY GUIDE

Target: vacation rental information packet

Remote Control / Home Theater Matrix

Mapping remote controls in a vacation rental information packet utilizes a visual input grid linking specific remotes to their corresponding television and streaming functions. This targeted diagram eliminates user frustration with complex home theater receivers, significantly lowering the volume of late-night technical support text messages to the host.

Implementation Outline

1

Input Routing Table

Markdown table mapping HDMI ports to specific devices (e.g., HDMI 1: Roku, HDMI 2: Cable Box).

2

Universal Remote Configuration

Brief steps on how to reset a universal remote if a guest alters the programming.
