

HOUSE RULES

Target: how to leave checkout instructions airbnb

Trash Separation & Recycling Diagram

Visually displaying trash separation rules for an Airbnb involves color-coded diagrams mapping specific waste types to municipal bins. Providing visual mapping directly above the interior trash receptacles ensures compliance with local recycling laws, preventing hosts from incurring expensive administrative fines from regional sanitation departments.

Implementation Outline

1

Bin Color-Code Table

Markdown mapping sorting types (Cardboard/Glass/Waste) to physical bin colors.

2

Curb-Placement Schedule

A simple weekly calendar graphic showing exact rollout times.
